

Our Trading Services

At Agriant Commodities, we specialize in connecting businesses with high-quality, reliable sources for essential commodities. Our trading services are designed to streamline the sourcing process, ensuring efficiency, quality, and trust in every transaction.

50+ Reliable Suppliers

We partner with trusted suppliers worldwide to ensure consistent quality, timely delivery, and a strong supply chain.

0 Supply Customer Case

Our flawless track record guarantees uninterrupted supply, ensuring reliability and trust in every transaction.

1M+ ton Containers of Grains, Oilseeds, Bird Feed & Meal Deals

With extensive global trade, we have successfully shipped over 1 million containers, supporting various industries with high-quality agricultural products.

10+ Years Market Experience

A decade of expertise in agricultural trading, logistics, and supply chain management ensures efficiency and market leadership.

50+ Global Customers

We proudly serve a diverse client base across multiple countries, building long-term partnerships through exceptional service.

5 Global Offices

With strategically located offices in Singapore, Indonesia, UAE, Turkey, and Canada, we ensure smooth operations, efficient logistics, and strong global market connectivity.

Products We Trade

Wheat

Wheat is a cereal crop grown for food and feed. Wheat is also used to refer to the grain of this crop, which is usually ground into flour and used to make bread.

Soybean

The soybean or soya bean (*Glycine max*) is a species of legume native to East Asia, widely grown for its edible bean, which has numerous uses. Traditional unfermented food uses

Soybean Meal

Soybean meal is used in food and animal feeds, principally as a protein supplement, but also as a source of metabolizable energy.

DDGS

Distillers' grains are a major by-product of bioethanol production, which can be used as a major feed or feed ingredient in the cattle, swine and poultry industry

Corn Gluten Meal

Corn gluten meal is a by-product of the manufacture of maize starch (and sometimes ethanol) by the wet-milling process (RFA, 2008). Corn gluten meal is a protein-rich feed, containing

Palm Kernel Meal

Palm kernel expeller meal (PKE) is a by-product from the manufacturing of palm kernel oil by the mechanical extraction of palm kernels. A dark brown protein meal with relatively high oil

Rapeseed

Rapeseed meal is a high protein-containing material that can be used as a feed for livestock and poultry. Typical meal contains a little less than 40% of protein; however it also contains about 12% crude fiber and glucosinolates, specific components of Cruciferae plants.

Sunflower Meal

Sunflower meal is the by-product of the extraction of oil from sunflower seeds. And it's the fourth largest oil seed meal produced and consumed in the world. Sunflower meal has the greatest potential use in ruminant rations but also has a place as a protein supplement in non-ruminant rations.

Fish Meal

Fish meal, or fishmeal, is a commercial product mostly made from fish that are not intended for human consumption; fishmeal is generally used to feed farm animals in agricultural setting

Red Millet

Red millet is a tiny reddish-brown grain commonly used in bird feed mixes. It is favored by finches, sparrows, and doves due to its rich nutritional profile, providing essential vitamins and minerals.

White Millet

White millet is a light-colored grain widely used in bird feed and animal diets. It is especially attractive to ground-feeding birds like doves and quails due to its mild taste and high digestibility.

Yellow Millet

Yellow millet is a small, round, golden-colored grain that is a staple in birdseed blends. It is high in carbohydrates, making it an excellent energy source for birds and poultry.

Corn

Corn is a versatile grain used in animal feed, human consumption, and industrial applications. It is rich in carbohydrates, making it a key energy source for livestock and poultry. Available in various forms such as whole, cracked, or ground, corn is widely used in global agriculture.

Canary Seeds

Canary seed is a small, nutrient-rich grain primarily used as bird feed, especially for canaries and other small birds. It has a high protein content and is known for promoting healthy feathers and energy in birds.

Sunflower Seed

Sunflower seeds are highly nutritious and used for both human consumption and bird feed. They are rich in healthy fats, protein, and essential vitamins. Available in black oil and striped varieties, sunflower seeds are a popular choice for wildlife, livestock, and oil extraction.

Global Network

Strong connections with trusted suppliers and buyers worldwide.

Quality Assurance

Comprehensive checks to ensure all products meet industry standards.

Custom Solutions

Tailored trading plans based on your unique requirements.

Timely Delivery

Reliable logistics partners ensure on-time delivery of goods.

Process

1. Consultation

Understanding your specific commodity needs.

2. Sourcing

Identifying and connecting you with the best suppliers.

3. Negotiation

Ensuring competitive pricing and favorable terms.

4. Delivery

Coordinating seamless transportation and delivery.

Our Trading Services

Over the past five years, we have successfully executed over 750 contracts with a 100% completion rate, zero defaults, and no legal cases.

These achievements establish us as the most reputable container brokerage firm in South Asia, based in Singapore. We proudly deliver to Indonesia, Vietnam, Thailand, Malaysia, Myanmar, and Singapore.
